Washroom Systems

# Vanities

Stylish, inspirational and functional, this comprehensive range of vanities and accessories provides the finishing touch to any washroom environment.

Armitage Venesta reserves the right to alter or change specifications without notice. Colours reproduced in this brochure are as accurate as the printing processes permit.

Please note: It is the Customers responsibility to ensure that colour contrast chosen complies with the new Building Regulations part M.

When you specify Armitage Venesta you are investing in a name you can trust to deliver quality, choice, value for money and industry-leading service. We have over 75 years experience in supplying washroom systems for every type of commercial use. Our products have stood the test of time not only in prestigious office and hotel developments but also in the most vandal prone environments. Whatever the location we can provide you with a solution that is truly fit for purpose with consistently fast lead times.

Our dedicated team of designers are committed to developing new products that will inspire and provide customers with optimum choice whilst meeting performance demands.

Armitage Venesta's reputation as the UK's leading washroom systems expert is supported by our service team, who are available to provide specification advice and technical help at every stage, including estimating, CAD layout drawings and after-sales support.

# Vanities

Introducing inspiration into any washroom environment, our comprehensive range of inspiring yet functional vanities and accessories will provide the solution to your vanity needs.

Promoting contemporary style and modern design, the choice of vanity offer includes streamlined glass units to create a stunning visual impact, Avonite vanity tops to add dimension to your design, compact for use in even the harshest of environments and an extensive range of laminate vanity profiles for situations requiring an economical solution that does not compromise quality. Our selection guarantees that even the most functional commercial washroom can become creative.

The introduction of our accessories range allows you to specify your entire vanity solution in one stop. After analysing the wasted space in and around the vanity area, Armitage Venesta's forward thinking design innovation has prompted the creation of our new clever accessories incorporating mirrors, lights, soap dispensers, towel dispensers, storage cabinets and bins that allow you to maximise the space in the washroom area and abolish the need for separate items.

For installations where lack of space is an issue, our new S-R-D wash station will provide the perfect solution, allowing the user to soap, rinse and dry their hands all within one attractive brushed stainless steel wall mounted unit.

All our vanities have the added flexibility of the *IPS Evolve* pre-plumbed option. This together with Armitage Venesta's extensive cubicle range and service promise will enable you to specify an inspirational vanity solution for any washroom environment with confidence.

# Oslo

A luxurious vanity solution combining the minimalist design feature of highly polished stainless steel basins with the sheer elegance of this contemporary glass cantilever vanity. Complementing the 15mm glass top, the brushed stainless steel brackets emphasise the simplicity of today's modern designs.

This stunning combination culminates in a prestigious solution for premium environments where an impressive visual impact is desired.

Silver monoblock single lever tap

Cantilever bracket, brushed stainless steel

**Vanity top** - 2250mm triple cantilever top, 15mm toughened glass

**Cantilever bracket** - Brushed stainless steel

**Washbasin** - Stainless steel without taphole 9S00001P0

**Bottle trap** - E0079AA

**Taps** - Silver monoblock single lever no pop up waste E0068AA

**Cubicles** - Equinox with polished aluminium pilasters and fittings

**Door** - Glass

**Partition** - Graphite

**Please note:** Walls supporting the glass cantilever must be of sufficient load bearing capacity to accept the weight of the unit.

Oslo units are suitable for light duty applications. Care should be taken in designing and routing of supply, drainage pipe-work and fittings. All such fittings to be by others.

# Avonite

Avonite, the proven solid surface material that provides a luxurious finish through its stone appearance to polish off any washroom installation.

The Avonite integral bowl provides the vanity unit with a smooth seamless finish and to add to the materials flexibility ceramic and stainless steel basins can also be specified. A choice of 10 dimensional shades are on offer to aid your design requirements.

# Laminate

Providing an economical solution that does not compromise quality or design, the laminate vanity option is the perfect solution for any dry environment.

Choice is a key design feature and with 8 vanity profiles to choose from and an extensive palette of 42 stimulating colours, you are provided with optimum levels of choice to deliver inspiration and innovative vanity solutions to even the most practical washroom environment.

The further option of low level vanities for children and screen print designs applied to the vanity under panels, adds to this materials flexibility when specification for schools and nurseries is concerned.

The durable vanity tops and underpanels are manufactured from 17mm moisture resistant chipboard faced both sides with high pressure laminate, creating an overall thickness of 19mm.

# Compact

A hard working vanity for hard working environments, this 13mm thick, solid grade laminate option offers the ultimate performance in the most demanding environments and is totally impervious to water. Compact is the perfect solution for both wet and vandal prone environments such as leisure centres and washroom areas demanding a robust installation such as secondary schools, colleges and public toilet areas.

The exciting colour palette comprising 42 vibrant and contemporary shades enables you to create a washroom environment that delivers strength and style without compromise.

## IPS *Evolve*

IPS *Evolve* the UK's leading metal framed, pre-plumbed washroom system provides the opportunity to specify single units of attractive wall hung vanities.

The simplicity of the system, which promotes a unique click-fix mechanism and on-site flexibility enables installation to be completed efficiently and cost effectively. All IPS *Evolve* units are delivered to site pre-plumbed with sanitaryware and brassware attached.

**Vanity top** - Multi run, 600mm single cantilever top, 15mm toughened glass  
**Cantilever bracket** - Brushed stainless steel  
**Washbasin** - Stainless steel without taphole 9S00001P0  
**Taps** - Jado Newhaven wall mounted L4003AA  
**IPS *Evolve* pre-plumbed panels** - Bronze with Bronze flashgaps  
**Please note:** Walls supporting the glass cantilever must be of sufficient load bearing capacity to accept the weight of the unit. Oslo units are suitable for light duty applications.

## S-R-D wash station

Specifiers are frequently tasked to design an area where space is a concern. Armitage Venesta have provided the answer with the introduction of our S-R-D wash station allowing users to Soap, Rinse and Dry their hands all within one wall mounted handrinse unit.

The attractive brushed stainless steel unit utilises the IPS *Evolve* pre-plumbed panelling system to create a contemporary streamlined handrinse answer for installations that lack the space for a floor mounted vanity unit.

**IPS *Evolve* pre-plumbed panels** - Cherry with Graphite flashgaps  
**Cubicles** - Centurion with satin anodised pilasters and light grey powder coated fittings  
**Doors and partitions** - Cherry  
**Accessories** - S-R-D wash station 0302024

## Clever accessories

With today's modern design trends leaning towards the minimalist, an evaluation of the usable space both within the vanity itself and the wall space above has prompted the development of our selection of accessories. Utilising current wasted space within the washroom area, we have designed products that abolish the need to place hand dryers, soap dispensers, storage units and bins elsewhere in the washroom by integrating the accessories within the vanity itself. Our mirror dispenser cabinets and bin chutes make our vanity units a one stop shop for washing and drying your hands and disposing of the paper towel.

Mirror dispenser cabinets 0302040

# Service and support

From the moment you make your first enquiry through to final installation, Armitage Venesta work in partnership with you to make sure you receive knowledgeable advice and full technical support at every stage. We also conduct Continuous Professional Development (CPD) presentations for the benefit of specifiers. To give you this unrivalled level of service we follow a **seven-stage plan**. This includes:

**1. First contact** Our sales team will advise you on suitable products for your requirements and supply you with product literature and colour boards. Alternatively, you may access our website where you will receive detailed information on our product range.

**2. Specification service** Our national team of managers will be happy to help you select the most suitable products for each project. A full NBS specification service can be provided.

**3. Estimating** A comprehensive estimate is prepared, giving a detailed breakdown of materials and prices.

**4. Layout drawings** Each order is supported with a full CAD service to ensure that design performance and installation criteria are met.

**5. Delivery** A prompt and efficient delivery service operates throughout the UK and Eire.

**6. Regular Installers** Our sales team will be happy to provide details of installation companies who regularly install our products.

**7. After-sales support** Just call us for prompt product support and for ordering replacement parts or additional products.

...with support every step of the way
