

LATERAL DESIGN STUDIO LTD

New Product Launch: **Innovative Level Access Threshold Door Solution**

We have the total solution for you to achieve a level access threshold without compromising the weather proofing of your constructional detail. Our system includes an integral drainage channel topped with one of our designer drain covers. It offers both function and form to achieve a level access through bi-fold & patio doors.

This means an end to unsightly and inefficient slot drains, or ad-hoc pebbles laid on top of plastic channels - which compromise your door system or landscape project.

We Offer:

- **Classic Designs** - choose from dozens of sophisticated designs, plus we even offer a bespoke design service for those who want something truly unique
- **Quality Materials** - choose from contemporary stainless steel, aluminium, traditional cast iron or our new Jonite stone composite covers.
- **Beautiful Finishes** - You can choose from a variety of finishes from brushed stainless steel to anodised aluminium, colour powder coated, or even bronze if required.
- **Retrofit Option Available**

The possibilities are truly endless...

LATERAL DESIGN STUDIO

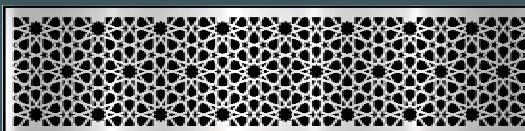

Contemporary Stainless Steel –Aluminium Covers

Our modern, stylish stainless steel channels are highly robust and come in eight designer options - replacing those unsightly plastic / galvanised steel 'ladder style' covers which scar every project.

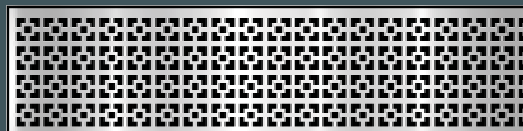

Our Stainless Steel covers are made from 70% recycled (316 grade also available) with a brushed or coloured powder coated finish. We also offer designer co-ordinated manhole & gully covers which fit standard drainage components.

Our Aluminium covers are 70% recycled & can come in anodised / powder coated colours to match your door system. [Special Order]

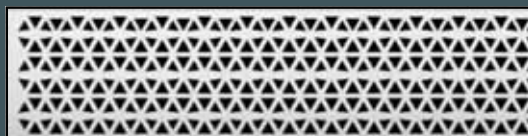

The covers fit the majority of drainage channels including ACO & Mea.

Classic Cast Iron Covers

Our sophisticated cast iron range reintroduces the charm and elegant design of yesteryear. Manufactured from 100% recycled cast iron, there are ten classic styles to choose from. These covers will age naturally—developing a golden bloom as opposed to — providing a natural rustic look for any classic scheme. We can also colour powder coat these classic designs to match your door system.

The covers fit the majority of drainage channels including ACO & Mea.

Jonite Composite Stone Channel Covers

We've just been awarded UK distributorship of JONITE products, an international company that supplies ethical composite stone products. The modern, stylish channel covers are highly robust and come in seven design options, with matching tree grates and gully covers covers. A bespoke design service is available and we offer these products in 6 sophisticated colours. [See Jonite Brochure]

Jonite products are made from part recycled stone, giving them a smart, natural look. They have a lower water absorption rate than natural granite and stone, which means the covers maintain their colour when in contact with pool water. All Jonite products are made with a minimum of 30% recycled materials, and as such are green label certified.

The covers fit the majority of drainage channels including ACO & Mea.
